5 May 1986

Mr. D. A. Wallace
Overseas Telecommunications, Inc.
1199 North Fairfax Street
Suite 703
Alexandria, Virginia 22314

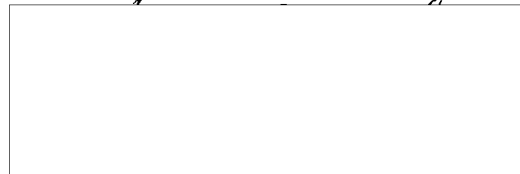

Dear Mr. Wallace:

I wish to emphasize to you that the execution of the appropriate forms, applications, and procedural actions necessary for activation of the FBIS microwave communications link is of the utmost priority. Would you please insure that your company expend all efforts necessary to close the link as soon as possible and advise me as to progress on a regular basis. You can contact me at my office on telephone number [redacted] and I wish to be apprised of progress in this matter on a weekly basis.

STAT

As you know, this particular communications link is an integral portion of an FBIS system critical to the United States. In view of the amount of governmental funds already committed, the urgency associated with the successful completion, and the importance of the overall mission to be accomplished, I consider it imperative that you, as the government's system contractor, pursue this on an absolute priority basis. The significance of this system, of which the microwave link is an integral part, can not be over emphasized as the information carried reaches the highest levels and is part of the national decision making process.

I anticipate hearing a positive response to this problem area in the very near future. Again, I wish to reiterate that I find it necessary to have weekly, detailed, reports documenting progress and specific steps taken. OTI should insure that pending actions be identified by person and organization.
